

# BE COOL!

RE-ENERGIZE • REFRESH • REJUVENATE

## How the Amazing Frosty Towel Works

**Just Open The Package & It's Ready To Use!**

**The Frosty Towel is an all natural & convenient way to stay cool & refreshed in the heat & humidity. It uses pure natural plant oils & extracts to cool you down in moments as well as refresh you.**

- **First we start with 100% Natural Premium Cotton**
- **We add an all natural essential oil & extract mixture to cool you down, invigorate you, & create evaporation on your skin**
- **Pure Glycerin is added to keep your skin moisturized**
- **Lemon Grass & Citronella are added to the main formula to naturally repel mosquitoes & other insects**
- **Mandarin or Grapefruit oil is added for a nice citrus scent. These oils are also a great natural cleansing agent**
- **The Denatured Alcohol that is added is known for preventing germs & bacterial growth ... the Glycerin keeps your skin moisturized**
- **We use other natural ingredients to help give it a two year shelf life.**

Open Package

2

Wave in the Air

3

Wipe Down

4

Wear on Neck

First thing you do is open the package & wave the Frosty Towel in the air. It will get cold in moments. You should wipe your arms & other parts of exposed skin with the Frosty Towel to increase evaporation – perspiration. The mixture will help to open the pores so that your skin breathes better. Then you should wear the Frosty Towel on your neck to help keep your core body temperature manageable. Here the Frosty Towel will actually get warm in the outdoor heat because it is absorbing your heat as it keeps your neck cool. This in turn helps you to stay cooler & refreshed. If it gets too warm, all you have to do is wave the Frosty Towel in the air & it gets cool again. If the Frosty Towel should dry out, simply add a tiny amount of water to moisten the oils & prolong its use. It will get cool again. The Frosty Towel will remain moist & cool. It does not have to remain super cold to work.
